

Instruction to Run Unbiased on a local server:

Please make sure that the following are installed on your computer:

- NodeJS for npm command

1. In Project folder create a '.env' file and declare the following local variables

REACT_APP_ADMIN_PASSWORD = *'your_password'*

REACT_APP_GRAPHENEDB_BOLT_URL= *'your_bolt_url'*

REACT_APP_GRAPHENEDB_BOLT_USER= *'your_bolt_user_id'*

REACT_APP_GRAPHENEDB_BOLT_PASSWORD= *'your_bolt_password'*

REACT_APP_GRAPHENEDB_URL= *'your_grapheneDB_url'*

2. in folder directory from command line type

'npm install'

THEN

'npm start'

3. Access the Admin page and do the following:

If your database has limited storage (free versions will; so don't skip this step)

- Click 'Clean Up' to make space for new articles

OR

- Click 'Delete Database' to completely remove all nodes

Then

Click 'Update Database'

Click 'Relate Articles'

The website should be ready and loaded with articles

4. Access website from local host and navigate
